

Pet Chews
Containing NO Animal-Origin Ingredients other than
Hides, Dairy, and Fish

[Note- if pet chews contain no animal origin ingredients other than dairy or fish- this is not the right article. For pet chews containing no animal origin ingredients other than dairy or fish- see the article entitled: Pet food containing NO animal origin ingredients other than those originating from fish or milk.]

If pet chews contain no animal origin ingredients other than **hides, dairy, and fish**, then the producing facility does not need to be inspected by Taiwanese authorities (it does need to be inspected by APHIS).

A. ADDITIONAL DECLARATION box of the VS Form 16-4. Pet chews containing no animal origin ingredients other than hides, dairy, and fish- may be exported on a VS Form 16-4 with the following exact statements in the “additional declaration” block.
:

- I. Product produced in a State **not** currently banned by Taiwan for avian influenza or Newcastle disease (**or** product that **does not** contain poultry origin materials):

Additional declarations:

*Products described below were manufactured at the following facility approved by a competent government authority in the United States for the production of pet chews:
[insert name and address of manufacturer].*

The products were produced [insert manufacturing date or dates].

Products are packaged in new and never before used packaging material.

The only animal origin ingredients in the products are: [insert all that are appropriate: rawhide, dairy, and or fish.]

- II. Product produced in a State currently banned by Taiwan for avian influenza or Newcastle disease that contains poultry origin materials:

Additional declarations:

*Products described below were manufactured at the following facility approved by a competent government authority in the United States for the production of pet chews:
[insert name and address of manufacturer].*

The products were produced [insert manufacturing date or dates].

Products are packaged in new and never before used packaging material.

The only animal origin ingredients in the products are: [insert all that are appropriate: rawhide, dairy, and or fish.]

Rawhide was heat-treated with the core of the product reaching a temperature of 70C for at least 30 minutes, or 80C for at least 9 minutes, or 100C for 1 minute. The products are handled in such a way as to prevent contamination with pathogenic microorganisms or any other animal origin materials.

B. PRODUCT Box of the VS Form 16-4 must contain the following text:

product name: [e.g. Dog chews]

quantity: [e.g. 500 pounds (10 5 pound boxes and 5 10 pound bags)]

species of origin: [e.g. bovine and avian]

Note- quantity must include the weight and number of packages. A "total" weight is not acceptable, if items are individually packaged. Taiwan is looking for descriptions such as the following: "500 pounds dog chews (10 5-pound bags, 1 50-pound bag, and 4 100-pound bags)."

A generic product name, e.g. "pet food," should be used instead of listing the name of each item.

Information regarding product codes is not required and should not be included on the certificate endorsed by APHIS. If exporters wish to provide this information to their importers, they should do it via other documentation (not endorsed by APHIS or part of the certificate endorsed by APHIS). It is strongly recommended that this documentation be provided to the importer via a method other than accompanying the shipment. Numerous shipments of pet food to Taiwan have been placed on hold in Taiwan because documentation provided indicated that product codes were different than some information on product packaging.

C. IDENTIFICATION BOX of the VS Form 16-4 must contain the following text:

Shipping container number: [insert shipping container number]
